

Consolidated Intelligence for Financial Services

**Sophisticated Performance & Risk Analytics for Financial Services**

EBIIntelligence Hub™ Release 8.0 is the next generation business intelligence solution for the financial services industry. It provides a heterogeneous reporting framework combined with a flexible data management architecture.

The Intelligence Hub is a part of the EBIPlus™ product family and is the ideal companion of the Oracle Financial Data Model (and associated OFSA suite of products) and the Oracle Business Intelligence Server as well as many other BI tools on the market today.

**EBIIntelligence Hub™ 8.0 Functional Overview**

The EBIIntelligence Hub™ delivers for the first time, the ability for users to choose their preferred reporting tool from a range of market leading tools such as Business Objects, Discoverer, BI Publisher, Microsoft Excel and Oracle’s BI Enterprise Edition all from the same meta data repository. Designed specifically to allow plug and play reporting, you can use the server to deliver:

- Web based static executive dashboards
- Web based interactive reporting portals
- Advanced analytical reporting and data mining
- Ad-hoc OLAP reporting
- High-fidelity regulatory & compliance reporting in PDF, Word, Excel

An added benefit of the EBIIntelligence Hub™ is that it optionally installs with a number of adapters designed to integrate and leverage various third party reporting tools on the market. The embedded Intelligence Hub Adapters enable the server to communicate freely with the Oracle Business Intelligence Server product suite and fully leverage your existing investment.

When delivered with EBIPlus you get the added benefit of the Foundation Services to link your Enterprise Decision Support Environment to sophisticated value-adding analytic processing.

EBIPlus Business Intelligence Hub

**Analytical Reporting**

Use the Intelligence Hub to bring together all your enterprise reporting solutions under a single, easily managed meta-layer.

- ❑ Oracle Discoverer 10g (now Oracle Business Intelligence Standard Edition)
- ❑ Oracle XML Publisher 10g (now Oracle BI Publisher)
- ❑ Oracle Hyperion Essbase
- ❑ Microsoft Excel
- ❑ Business Objects

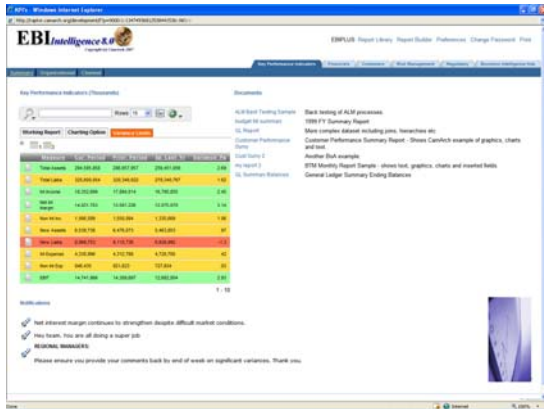

Create and Manage Analyst Reporting Online

## Dashboard Portal

Deliver crucial information to executives and business lines via a VPD protected web portal.

- ❑ Static exportable reports available in pure HTML format ensuring fast response times and quick downloads to Excel.

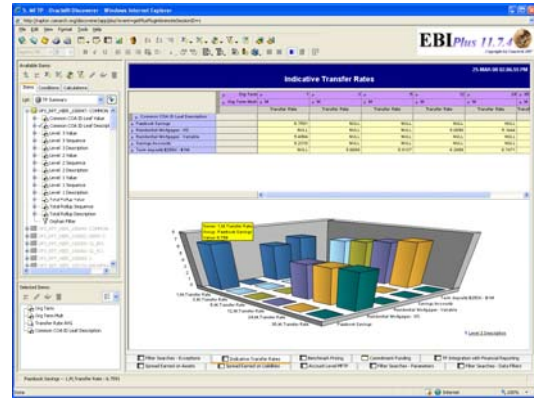

Dashboard Key Performance Indicators

- ❑ Pre-built portal ready to deliver business metrics to the end-users of enterprise information.
- ❑ Interactive reporting available allowing users to dynamically create custom calculations, charts, filters, conditional formatting and so on.
- ❑ Optionally publish high fidelity reports using the XML Publisher adapter.
- ❑ Integrate reporting with process enrichment from the Foundation Services workflow scheduler.

## Ad-Hoc Reporting

Allow analysts to perform data mining analyses using leading edge tools like OBIEE, Excel and Discoverer.

- ❑ Create, share and manage insights by building custom reports using industry standard tools & applications.
- ❑ Advanced OLAP drag and drop pivoting, custom calculations and formatting.
- ❑ Interactively drill to detail.
- ❑ Publish results to PDF, XML, HTML and many other formats.

Discoverer 10g Plus Edition – MFTP Report Pack Example

## Regulatory Reporting

All financial services companies have any number of compliance reporting requirements. Being able to easily define and publish a high fidelity report using MS Word and optionally publish to PDF, Word or Excel is a key feature of the Intelligence Hub.

- ❑ Define reports using MS Word functionality.
- ❑ Insert logos, charts custom tables.
- ❑ Use the same template for multiple reporting entities by passing the same report over the virtual private database.
- ❑ Archive old copies online for easy retrieval.

## Embedded Report Options

The *Intelligence Hub* also comes with the option to install a number of standard, pre-built reports grouped around functional areas.

- ❑ Matched Rate Funds Transfer Pricing Pack
- ❑ Asset Liability Management Pack (Stochastic)
- ❑ Asset Liability Management Pack (Scenario)
- ❑ Risk Adjusted Performance Metrics (RAPM) Pack

All up, the *Intelligence Hub* comes with over 300 seeded reports across the various packs and options.
